Introducing The SaltFacial® Skin Renewal Therapy System, a non-invasive, multi-modality medical-aesthetic device that treats a wide variety of skin conditions and improves the skin’s quality and health...Naturally!

The SaltFacial Skin Renewal Therapy System can be used for stand-alone treatments, as an adjunct to other procedures, or in combination as the 3-step SaltFacial Skin Renewal Therapy. Results are immediate, with no side effects and no downtime.

Use the SaltFacial Skin Renewal Therapy System to treat the following skin conditions:

<table>
<thead>
<tr>
<th>Condition</th>
<th>Treatment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Acne</td>
<td>Age spots</td>
</tr>
<tr>
<td>Enlarged pores</td>
<td>Fine Lines &amp; Wrinkles</td>
</tr>
<tr>
<td>Pigment</td>
<td>Texture &amp; Tone</td>
</tr>
<tr>
<td>Scars</td>
<td>Stretch marks</td>
</tr>
</tbody>
</table>

The SaltFacial Skin Renewal Therapy System is safe and effective for all skin types. It can also be used as an adjunct to popular aesthetic procedures, including:

- Microneedling
- Injectables & Fillers
- Ablative and non-ablative laser treatments
- Pre-surgery for skin conditioning
- Post-surgery for faster healing and to help prevent infection
- Hair restoration
The SaltFacial® Skin Renewal Therapy is a customizable 3-step treatment designed to improve dermal health and address the hallmarks of beautiful skin: texture, tone, and color.

**Step 1: Sea Salt Resurfacing**

The pressurized delivery of all-natural sea salt safely and effectively exfoliates the skin. By using only positive pressure (NO vacuum or suction) a more aggressive exfoliation is possible without the risk of vacuum-based adverse events such as bruising, streaking, erythema or hyper-pigmentation. The patented re-useable hand piece features a unique angle of impingement that allows for the complete removal of the stratum corneum.

- Antibacterial and antimicrobial – disinfects and protects against infection
- Hydrates the skin by drawing moisture in at a cellular level
- Balances skin pH levels for improved healing
- Temporarily increases skin permeability for improved topical absorption

**Step 2: Cavitation Ultrasound**

The cavitation ultrasound uses sound waves to create space between cells for optimal delivery and absorption of topical products.

- Increases depth of delivery and absorption of topical products
- Promotes healthy circulation for improved access to oxygen and nutrients to support cellular-turn-over and facilitate healing

**Step 3: LED Phototherapy**

The high-intensity LED Phototherapy module has 3 large adjustable panels with 1756 LEDs and 4 wavelengths proven to safely and effectively treat a wide variety of skin conditions including Acne, MRSA, Staph, Rosacea, Psoriasis, pigment, fine lines and wrinkles. It also helps promote rapid healing and reduces post-procedure inflammation and redness.

- Covers a large treatment area (total panel coverage 16”x 36”)
- High energy output for faster results
- 4 treatment wavelengths for effectively treating a wide variety of conditions
- Promotes rapid healing for improved outcomes and less downtime
- Improves outcomes in stand-alone and adjunctive procedures
